

## NATIONAL WASTE SERVICES INC.

*growing together as a team*

Attention David Lee;

Creative Environments Inc  
462 Vaughan Mills Rd  
Vaughan, ON L4H 1G7

David, we want to take this opportunity to thank you for introducing us to the Forsythe Eco Logo certified Hydraulic Fluid **PowerFlo**. The PowerFlo not only lessens the impact of spills in sensitive environments along with the fact that PowerFlo is also fire resistant makes it safer for our employees to work around.

If that wasn't enough **PowerFlo** made our pumps run significantly quieter and smoother even in the coldest winter days, in our 2003 Fanotec garbage packer truck. We also experienced less leakage from the lines and cylinders and the data logger temperature test proved our truck runs 25 degrees cooler than with the traditional mineral oils.

We noticed a significant improvement in overall operating performance since switching to **PowerFlo**.

We would recommend the use of **PowerFlo** Hydraulic Fluid as the replacement for mineral or vegetable oils in similar applications.

We are looking at budgeting for converting our Lindsay fleet also, in 2009.

Sincerely,

A handwritten signature in black ink, appearing to read "Les Anderson", is written over a horizontal line.
